Education

Brighton College (2015-22)

Brighton, East Sussex

A level – three A*'s in Maths,
Computer Science & DT

GCSE – three 9's (Computer
science, Chemistry & DT) & six
8's

Overview

Gap year student from Brighton College, going to study computer science at university next year. I'm a hard working and ambitious individual who strives for success in every facet of work. I thrive in both working independent and as part of a larger team whilst also being able to lead a team towards a common goal.

Experience

Sep 2022 – Current

Digital security consultant (intern) • Saman bank

- Worked to deadlines and have quotas to meet
- I am a member of a small team that worked closely together to achieve a common goal
- My consultancy is crucial for the security of the tens of millions of members of saman, therefore accountability and attention to detail is crucial in my role
- I have to give regular briefings and updates to the board and CEO, whilst engaging in discussions to aid understanding.
- Prototyping of the proposed methods are regularly created and tested using multiple languages such as python and C#, with these then being presented to the development team.

Aug 2021 – Apr 2022

President of first robotics team 8173 [Gear 1] (Volunteer)

- I led the whole team through the complex engineering and mathematical challenges of making and programming a competition robot from scratch.
- During my time I also co-led the outreach of the project, talking to Brighton based companies to get sponsorship funding for our program.
- I managed to secure funding from Brighton college to create a partnership program with underprivileged children in other schools to get them into STEM and robotics.
- I had to work under high pressure deadlines, due to the nature of the competition these had to be met otherwise the team would face disqualification.

Key skills

Python – pyqt, matplotlib
Sql – sqllite
AutoCAD
HTML
Mathematics (money handling)

Qulifications

Duke of Edinburgh gold

Communication

During my time at Brighton College I attended a computer science discussion society in which I would take part in regular discussions and give presentations. On top of that I completed all the components of DofE gold, in which communication with the team was crucial for our success.

Leadership

During my final year of school I lead the schools robotics team to an international competition. Whilst also captaining the school's basketball team. I was also the head scout for the 27th Brighton scouts, leading the troop through multiple excursions and camps.
